School Garden Project Report

Sample education and sustainability report for taxonomy practice

Date: 24 October 2026

Project summary

Students and teachers created a small learning garden beside the school library. The garden is used to teach plant care, teamwork, and composting.

Work completed

The group prepared six garden beds, labelled twelve plant varieties, and started a compost container for fruit and vegetable scraps.

Challenges

Hot weather increased the need for watering, and some labels were damaged by rain. The team plans to add shade cloth and use weather-resistant labels.

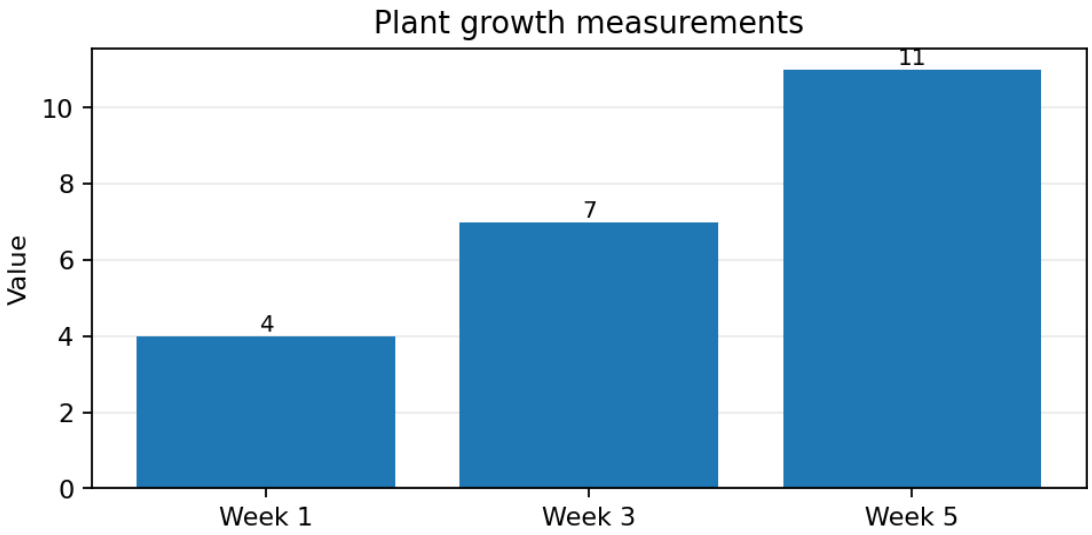

Recommended actions

- Create a rotating watering schedule.
- Replace damaged labels with weather-resistant versions.
- Record plant growth every two weeks.

Garden activity log

Activity	Quantity	Responsible group	Status
Garden beds	6	Student team	Complete
Plant labels	12	Science club	Replace some
Compost checks	1 container	Garden volunteers	Ongoing

Plant growth measurements
